github.com/davidtiger3622

PROFESSIONAL SUMMARY

Full-stack developer (backend-heavy) with 5+ years of experience building backend systems, full-stack web applications, AI evaluation workflows, automation tools, and structured data solutions. Proficient in Python, JavaScript, React, Node.js, FastAPI, SQL, PostgreSQL, Docker, Linux, REST APIs, AI automation platforms (n8n, Make, Zapier, Airtable), and modern AI-assisted development workflows. Experienced in rapidly developing prototypes, evaluating AI-generated code, debugging complex software systems, and building scalable, production-ready applications with a strong backend focus. Passionate about AI-native software development, agentic AI workflows, automation, and building impactful products in fast-moving remote engineering teams.

CORE SKILLS

- Programming Languages: Python, JavaScript (ES6+), TypeScript, SQL, Bash
- Frontend Development: React, HTML5, CSS3, Tailwind CSS
- Backend Development: Node.js, Express.js, FastAPI, Flask, REST APIs
- Databases & Data: PostgreSQL, SQLAlchemy, JSON, Database Design, CRUD Operations
- Software Engineering: Full-Stack Development, Backend Development, API Integration, Authentication Systems, JWT Authentication, Microservices, Automation, Structured Data Processing, Scalable System Design
- AI Automation & Integration: n8n, Make.com, Zapier, Airtable, Workflow Automation Design
- Testing & Infrastructure: Docker, Linux (Ubuntu), WSL, Git, GitHub, VS Code, Postman, Pytest, Runtime Debugging, CI/CD Validation, Dependency Resolution, Containerized Development
- AI & Modern Development: AI-Assisted Software Development, AI Coding Evaluation, RLHF, AI Benchmarking, Prompt Engineering, Agentic AI Workflows, AI Automation, Technical QA, Structured Output Validation, AI Development Workflows, Rapid Prototyping
- Professional Skills: Analytical Problem Solving, Technical Documentation, Remote Collaboration, Agile Development, Fast-Paced Startup Environment, Ownership, Cross-Functional Communication

PROFESSIONAL EXPERIENCE

Backend Engineering Intern — FlyRank (Remote)

Jun 2026 – Aug 2026

- Built and progressively enhanced backend APIs for the Backend AI Engineering track, advancing from minimal CRUD endpoints to full database-backed services.
- Migrated a Node.js/Express Task API from in-memory storage to persistent SQL storage, implementing full CRUD operations via raw SQL queries.
- Applied the repository pattern to swap between in-memory and PostgreSQL implementations while containerizing the stack with Docker and docker-compose.
- Practiced structured, stage-based Git workflows with descriptive commit messages and authored technical documentation, including READMEs, setup instructions, and example queries.

Full-Stack Developer — AfterQuery (Remote)

May 2026 – Jun 2026

- Designed and implemented backend services and full-stack web applications using Python, JavaScript, React, Node.js, SQL, and REST APIs.
- Designed workflow automations using n8n and Make.com to streamline engineering and data processing tasks.
- Built infographic projects translating data and concepts into visual, code-based graphics.
- Worked on a terminal bench project and contributed to RLHF (Reinforcement Learning from Human Feedback) initiatives.
- Integrated authentication systems, APIs, and relational databases into scalable applications.
- Created reproducible Docker-based development environments for testing and deployment.

- Performed debugging, dependency resolution, API integration, and performance optimization across distributed development environments.

AI Benchmark & Evaluation Specialist — Turing (Remote)

Oct 2025 – Apr 2026

- Designed and evaluated AI coding benchmark tasks for large language models across multi-file software engineering projects.
- Worked extensively with Docker, Linux, Git, APIs, JSON workflows, and containerized development environments.
- Evaluated AI-generated code for correctness, scalability, reproducibility, and production readiness.
- Debugged runtime failures, dependency conflicts, and complex software workflows.
- Improved benchmark quality through engineering reviews, workflow optimization, and technical discussions.

Video Annotation Expert — micro1 (Remote)

May 2025 – Aug 2025

- Performed structured video annotation and quality assurance for AI training systems.
- Reviewed outputs for consistency, technical accuracy, and compliance with project requirements.
- Supported AI data preparation and workflow validation initiatives.

SQL QA & Data Labeling Specialist — e2f (Remote)

Dec 2024 – Feb 2025

- Conducted structured dataset validation and quality assurance for AI evaluation workflows.
- Developed SQL queries for data verification and integrity checks.
- Ensured annotation consistency, formatting accuracy, and workflow compliance.

AI Data Annotation & QA Specialist — Remotasks (Remote)

Aug 2020 – Mar 2024

- Completed image, text, and structured data annotation projects supporting AI model training.
- Maintained high-quality standards across distributed remote environments.
- Reviewed annotations for consistency, accuracy, and compliance with project specifications.

EDUCATION

Bachelor of Science in Statistics and Programming

Machakos University, 2017 – 2021

CERTIFICATIONS

- IBM Full Stack Software Developer Professional Certificate
- Meta Full-Stack Developer Professional Certificate

ADDITIONAL INFORMATION

- Available for remote full-time and contract software engineering opportunities.
- Flexible and reliable across different time zones.
